# Eliminate Cap-Ex

Replace your printer fleet free of charge

## What are we offering?

The desktop Kyocera devices are a suitable replacement for almost all types of A4 laser printer. The toner cartridges utilised in the Kyocera machines offer significantly **higher page yields** than most other laser printers providing you with **exceptionally low running costs**. There is no capital outlay for the printers, in addition there are no rental, lease or click charges.

We will deliver and install completely **free of charge** and there is also no requirement to relinquish your existing equipment.

All engineer call outs, labour, parts and consumable parts are free of charge, which includes fusers and transfer kits.

**There will never be any additional expense to run and maintain these devices outside of the toner cartridges.**

## How does it work?

Each device belongs to us throughout, however you can return the machine at any time, with no termination costs.

Your commitment is to order a full set of toner cartridges at the outset with each device required. The price of the toner is at a market rate price agreed when you first order the equipment.

ALL additional toners must be supplied by us, although you do not have to order full sets of toner and at any given time you can order single units based on what you require.

We are confident this will eliminate capital expenditure, while at the same time upgrading your equipment with superior devices. It also gives you **peace of mind** as **no maintenance charges** or parts costs will be incurred.

## Pay only for the toner you need!
